Planning Your

KITCHEN

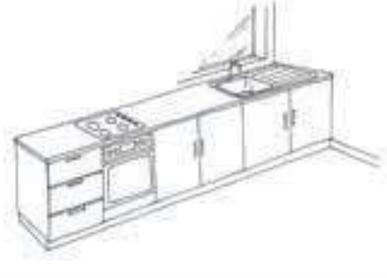

Let us show you typical kitchen shapes to guide you, then the rest is up to you. What are your must haves and why are you buying a new kitchen? Take inspiration from our suggestions and ensure you've got everything covered.

CONSIDER YOUR LAYOUT

Your Jigsaw kitchen will be highly personal, as you piece together everything we have to create your own look. The first step though is confirming your layout and understanding which works best for your home. We've illustrated the most common styles for you found within the UK, but if you're lucky enough to have a completely blank canvas, then enjoy creating your own!

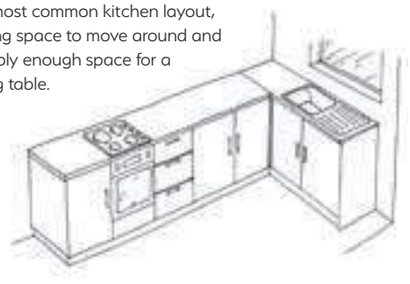

LINEAR

Used for compact kitchens, combine with clever storage solutions to maximise the space.

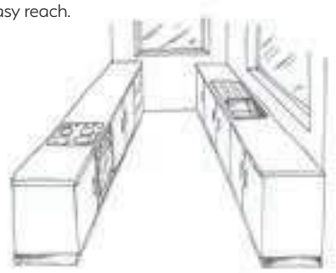

L-SHAPE

The most common kitchen layout, leaving space to move around and possibly enough space for a dining table.

GALLEY

Works best for long narrow kitchens with everything within easy reach.

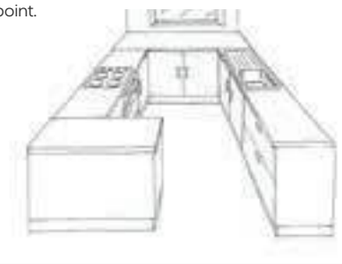

U-SHAPE

Great for lots of storage space, use pull out corner units for easy access to all your pots and pans.

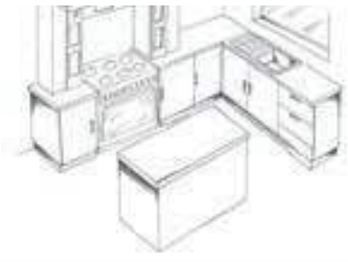

G-SHAPE

Get additional storage and worktop space with a G-shaped kitchen, also ideal for creating a social centre point.

ISLAND

This desirable layout works well with large open plan kitchens, creating a flexible and social working space.

Room Considerations:

ROOM DIMENSIONS

- Walls, inc. exterior ones
- Height of room
- Boiler & radiators
- Windows & doors, inc. frame and which way they open

THE DETAILS

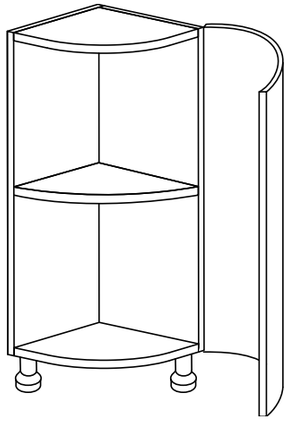

- Location of sockets
- Waste pipes
- Air Vents
- Gas pipes

APPLIANCES

- Integrated / free standing
- Any existing appliances

CABINET CHOICES

Cabinets are the foundation of a kitchen with multiple sizes and shapes now available to navigate around any room. We have 5 matt colours* available meaning you can choose to co-ordinate or contrast with your door choice.

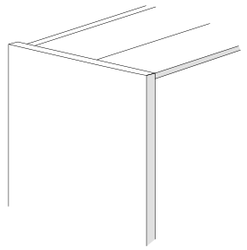

*Oak not available for true handleless

What makes our cabinets extra special?

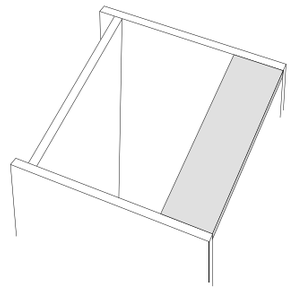

18mm back panel for added rigidity on base units, means you don't need to worry about your cookware damaging the backs!

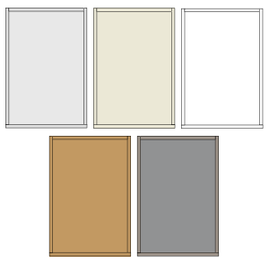

2mm PVC on leading edges prevents moisture from getting into the cabinet structure and causing damage.

Be assured of lasting quality with our 18mm thick cabinets as standard.

Unlike some other cabinets, our cabinets come with a 100mm cross rail to add further stability.

We have 5 colours to choose from, to complement our vast array of doors.

COMMON PROBLEMS WITH TYPICAL SLAB DOORS:

PEELING VINYL

Vinyl doors are glued and have the propensity to peel when exposed to the regular steam of a kettle or heat of an oven.

CHIPBOARD

Chipboard can be used as a door substrate but can blow and raise when exposed to water. Not a good combination for a kitchen.

BUBBLED VINYL

Vinyl doors start to bubble before peeling creating an unsightly look that can't be repaired.

PEELING EDGES

Look out for peeling edges that can flap and irritate you. It's common in kitchens and home and office furniture.

True handleless has been an ever growing trend but utilising a contemporary shaker door with it creates a new aesthetic that's a personal favourite of mine.

LIGHTING

Lighting in the kitchen is essential from both a task and ambience perspective. Food preparation typically takes place under wall cabinets where further illumination is often desirable.

Soldan Flexible LED strip lighting

Flexible strip lighting can be cut to size and is commonly used underneath wall cabinets and worktops, or on plinths to create additional ambience.

Steina Kea LED

The triangular styling of Kea is a timeless favourite in the UK. Use these underneath wall cabinets to provide additional task lighting.

Steina Downlight LED

The contemporary circular design of the Steina Downlight can be used under wall cabinets or within them to create a display unit.

Steina Faro LED

Steina Faro lights are typically positioned subtly underneath wall cabinets. Their unobtrusive design is a natural choice in a contemporary kitchen.

Steina LED Tube

Tube lighting maximises impact and is easily positioned under wall cabinets. Use a continuous line or around specific areas.

Picka Plinth Lights LED

Available in round or square designs.

Add plinth lights to the base of your kitchen units to add subtle ambience to the room. Illuminate your kitchen at night solely with plinth lights to create a 'show house' effect. Choose from square and round designs.

KITCHEN DOOR CARE INSTRUCTIONS

CLEANING

We recommend the following door cleaning instructions for all of our doors:

> Clean the doors using only a solution of 95% lukewarm water with no more than 5% soap
> **DO NOT** spray anything on to your doors - this includes the solution recommended above
> Use a clean damp (not wet) cloth
> Dry with a soft clean cloth. If it is a timber door, run the cloth along the grain direction
> Any cooking marks must be wiped immediately
> Do not allow liquids to seep into joints of doors. Wipe any spillages immediately.

DO NOT use any of the products listed below to clean the door as they may mark and damage the surface:

> Wax furniture polish
> Bleach / chlorine based cleaning products
> Abrasive cleaners
> Solvents
> Multi-purpose cleaners
> Alcohol based cleaners
> Ammonia or any other similar product
> Scouring pads or abrasive cloths

ENVIRONMENTAL INFORMATION

Please be aware, localised or intense heat/steam can damage fascias. Subsequently the use of small appliances such as kettles, toasters etc. in close proximity to your kitchen fascias should be avoided. Doors should not be exposed to extreme temperature changes. Due to their manufacturing process, vinyl doors must not be exposed to temperatures above 70°C as this may cause damage to the door's surface.

Due to the limitations on photographic reproduction, colours may differ slightly from the actual products shown.
